

Abdali gate

Location : Amman, Jordan

Architect : AS. Architecture-Studio

Client : Al Seraje Real Estate Development PSC

Package : Glazing facade

Scope : Façade engineering

Date : 2007-2016

Two 60m tall towers form the focal point in a new urban development in Amman.

The first is mixed use residential and office ; the second is solely office use. T/E/S/S is appointed for the technical design of the facades. The design intent for the façade on one of the towers was to give it the appearance of "pixels".

T/E/S/S carried out detailed research and studies on glazing finishes to obtain the desired effect. The second tower is over-clad in thin layers of marble.
